NEMA 17 is a hybrid stepping motor with a 1.8° step angle (200 steps/revolution). Each phase draws 1.2 A at 4 V, allowing for a holding torque of 3.2 kg-cm. NEMA 17 Stepper motor is generally used in Printers, CNC machines and Laser Cutters.

ACT DM420 Stepper motor driver for NEMA 17, 12 - 36 V. 1 Item-No.: ACT DM420 € 19, 45. incl. VAT. excl. shipping costs ... It is designed for use with 2-phase hybrid stepper motor of all kinds with 20mm to 42mm outside diameter and less than 2.0A phase current. This circuit that it adopts is similar to the circuit of servo control which enables the motor to run smoothly almost without noise ...

Nanotec offers integrated stepper motors in three sizes and with a holding torque of up to 8.8 Nm. Due to their high torque at low speeds, closed-loop stepper motors are especially well-suited for direct drives. Precise position, speed and torque control ; Magnetic single-turn absolute encoder or battery-free multi-turn absolute encoder (PD4 E... M) Digital and analog inputs, digital outputs ...

### **Stepper Motors with Controller | NEMA 17-34 | NANOTEC**

This NEMA 17 Pancake Stepper Motor offers 0.7A current per phase, and produces 1.32Kg.cm holding torque with a small form factor of only 25mm high. This is substantially more compact than many standard Stepper Motors, and that of course makes these steppers ideal for applications in which form factor and total weight is a serious concern. ...
