### **The Evolution Man Or How**

Evolution Man was first published in 1960, written by Roy Lewis. It is a story of a small tribe of cavemen slowly making progress in the world as they develop and learn to use tool, make fire and weapons. Of course, this probably did not happen as quickly as it does in the narrative, but that is all part of the charm of the book.

The Evolution Man is a novella about a family of ape men as they discover the building blocks of civilization. It doesn't take long to realize that this is a humorous book and requires the reader to accept a number of ridiculous details. The author makes this abundantly clear, as the patriarch of the family occasionally guesses at what epoch they must be in, according to the discoveries they've made. It's better to read this book as you would a fable and not ask for too much logic ...

Published without fanfare some thirty years ago in England, Roy Lewis' Evolution Man: Or, How I Ate My Father has been rescued from the bowels of obscurity by Italian publisher Roberto Calasso. And this comic tale of Pleistocene civilization is quite a find, blending the primal power and oddity of Kafka's and Calvino's parables with a heavy seasoning of Monty Python humor.

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates—in particular genus Homo—and leading to the emergence of Homo sapiens as a distinct species of the hominid family, which includes the great apes.

### **Human evolution - Wikipedia**

Human evolution, the process by which human beings developed on Earth from now-extinct primates. Viewed zoologically, we humans are Homo sapiens, a culture-bearing upright-walking species that lives on the ground and very likely first evolved in Africa about 315,000 years ago.

### **human evolution | Stages & Timeline | Britannica**

The timeline of human evolution outlines the major events in the evolutionary lineage of the modern human species, Homo sapiens, throughout the history of life, beginning some 4 billion years ago down to recent evolution within H. sapiens during and since the Last Glacial Period.

### **Timeline of human evolution - Wikipedia**

The theory of evolution of man is supported by a set of independent observations within the fields of anthropology, paleontology, and molecular biology. Collectively, they depict life branching out from a common ancestor through gradual genetic changes over millions of years, commonly known as the "tree of life."
